### The Holistic Facial

This facial embodies our core belief that radiant skin is a reflection of health on the inside. Start by identifying your unique Skin Personality through a conversation about diet, stress level, lifestyle and skin care. Your facial will begin with a luxurious lymphatic brushing followed by a detailed sculpting massage to release facial tension, improve blood flow and nourish your skin's microbiome. After analyzing your skin, your facial will be customized with a series of targeted treatments, including exfoliation and extractions.

We will be continuing some cosmetic improvements to the spa this month. Please pardon our movements and appearance during this time. We appreciate your understanding in advance.
